EXPERIENCE

Graphite Design Group - Seattle, WA - Architect

August 2016 - Present

I'm currently designing the West Main property for Vulcan Real Estate. It's a shell and core project consisting of three high-rise, mixed-use office towers (+800,000 sq ft) in Bellevue. When we wrap in the next few months, I'll have seen the entire project from initial sketches to total completion. I've worked as a holistic designer, with experience that includes:

- Created initial design concepts, diagrams, and models for client presentations
- Produced and refined drawings throughout design development
- Created construction documents with Revit
- Prepared permitting documents for the City of Bellevue and Seattle
- Coordinated curtainwall, structure, landscape, waterproofing, energy modeling, door hardware, lighting, and environmental graphics consultants
- Facilitated construction by answering RFIs, reviewing submittals, and performing site visits
- Other Project Experience: Amazon Block 18/Frontier, Vulcan Lakefront Blocks & Amazon Block 21/Nitro

KTGY Architecture + Planning - Irvine, CA - Architectural Intern

June 2015 - September 2015

Robinson Hill Architecture - Irvine, CA - Architectural Intern

June 2014 - August 2014
